## Summary

**Project:** Develop a NAPPO Science and Technology document on the risks associated with Lymantriids of potential concern to the NAPPO region identifying species and pathways of concern.

**General comments:** EG members discussed the content of the EG report that will be presented at the NAPPO annual meeting. The following aspects were considered:
- Target audience (AGM EG, Risk assessors and survey personnel)
- Presentation content: EG members decided to include information on the number of datasheets analyzed, progress in the risk analysis of the species under consideration and an example of a datasheet. The TD volunteered to tabulate the data and provide the information to the EG member presenting the report at the NAPPO annual meeting.
