Outline

- Systems approaches
- Examples of measures
- Types of systems
- Starting a system
- Verification of the system

Systems Approach

 Integrate measures for pest risk management in a defined manner, could provide an alternative to single measures to meet the appropriate level of phytosanitary protection of an importing country. A systems approach requires the integration of different measures, at least two of which act independently, with a cumulative effect (ISPM 14).

Systems Approach

- Application of critical control points to identify and evaluate points in a pathway where specified risks can be reduced and monitored.
- Opportunities for cooperation between importing and exporting countries.
- Usually designed as an option that is equivalent to but less restrictive than other measures.
- Opportunity for innovation and flexibility for managing risk.

Examples of Measures

- Cultural practices
- Post-harvest disinfestation / treatment
- Inspection
- Pest surveillance
- Sampling
- Testing
- Resistant hosts
- Pest free areas / pest free places of production

Minimum Requirements for a measure

- Clearly defined
- Efficacious
- Mandatory
- Can be monitored and controlled by the responsible NPPO

Types of systems

- Critical control point system (HACCP)
- Seed certification / OECD Seed Schemes
- Good Seed and Plant Practices
- Quality Management System (QMS)

Starting the system

- Establish an outcome based flexible framework
 - Roles and Responsibilities
 - Requirements
 - Audit / verification process
 - Dealing with non-compliance
 - Approval Process / Registration
 - Review
 - Dispute resolution

Verification

- In country system audits
- Document review to supplement in country audits
- Trial periods
- International accreditation processes for testing labs
- Third party audits

Summary

- Systems are a combination of measures that are equivalent to but less restrictive than other measures.
- There are options for systems verification.
- <u>Ideally</u> a common system can be applied to meet the needs of multiple importing countries.
